EXPERIENCE

Feather Softwares - UI UX Designer [2025-Current]

- **Led end-to-end B2B design:** Directed brand identity, website design, and mobile app interface creation for enterprise clients.
- **Aligned design with business goals:** Translated core business requirements into polished, user-centered digital products to improve client satisfaction

Memo Infotech - UI UX Designer / Graphic Designer [2024-2025]

- **Shipped SaaS and Mobile Apps:** Designed complex software interfaces from initial wireframing to final high-fidelity visual execution.
- **Drove brand marketing:** Strengthened company market presence by designing cohesive email campaigns, logos, and marketing assets.

Hyundai Motor - Trainee [2022-2023]

Worked on diagnostic tools, internal software interfaces, and automotive workflows, focusing on user research, visual documentation, and usability feedback to enhance efficiency and user experience.

PROJECTS

BGWRAP - [Link](#)

Designed a high-precision background removal plugin supporting single and bulk image processing, **used by 20K+ users**.

Flint – AI-Powered Money Transfer & Expense Tracking App- [Link](#)

Flint is an advanced financial management application that simplifies money transfers and expense tracking using AI-powered automation and intelligent insights

Grayscale Wireframe Converter - [Link](#)

Grayscale Wireframe is a Figma plugin that instantly converts designs into clean grayscale wireframes by simplifying colors, replacing images with placeholders, and preserving visual hierarchy
